

A Presentation of Technological And Demographic Trends

Neba Evelyn Aleah

03 October 2024

OUTLINE

- Executive Summary
- Introduction
- Methodology
- Results
 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- Technology trend analysis for databases and programming languages on key skills and location
- Compensation analysis based on gender and age
- Gender GAP analysis in jobs
- Trends on Programming languages and databases
- Technology and demographic trends on;
 - Countries
 - Gender
 - Age
 - Work experience

INTRODUCTION

- Data collection sources
 - Collected jobs data for analysis using GitHub API
 - Collected survey data for wrangling from stack overflow
 - Collected survey data from dashboard visuals from Kaggle survey 2023 data
 - GitHub job postings
- About: Analyze the trends in software development
- Purpose;
 - To identify future skill requirements
 - To know the top programming languages in demand
 - To identify the top database skills in demand
 - And the popular IDE
- Audience: Human Resource and IT Managers

METHODOLOGY

- Data Acquisition
 - Identifying data resources
 - Understanding data formats and structures
 - Data collection (e.g web scraping)
- Data Preparation
 - Data normalization, reduce redundancy, ensure data integrity
 - Data cleaning/wrangling.
 - Transformation of data through scaling
 - Data aggregation; grouping, sums, averages
- Modeling and Analysis
 - Select appropriate statistical methods
 - Finding the relationships between variables
- Create Visuals and communicate
 - Compelling visuals like charts, graphs
 - Communicate the story behind your findings to your audience

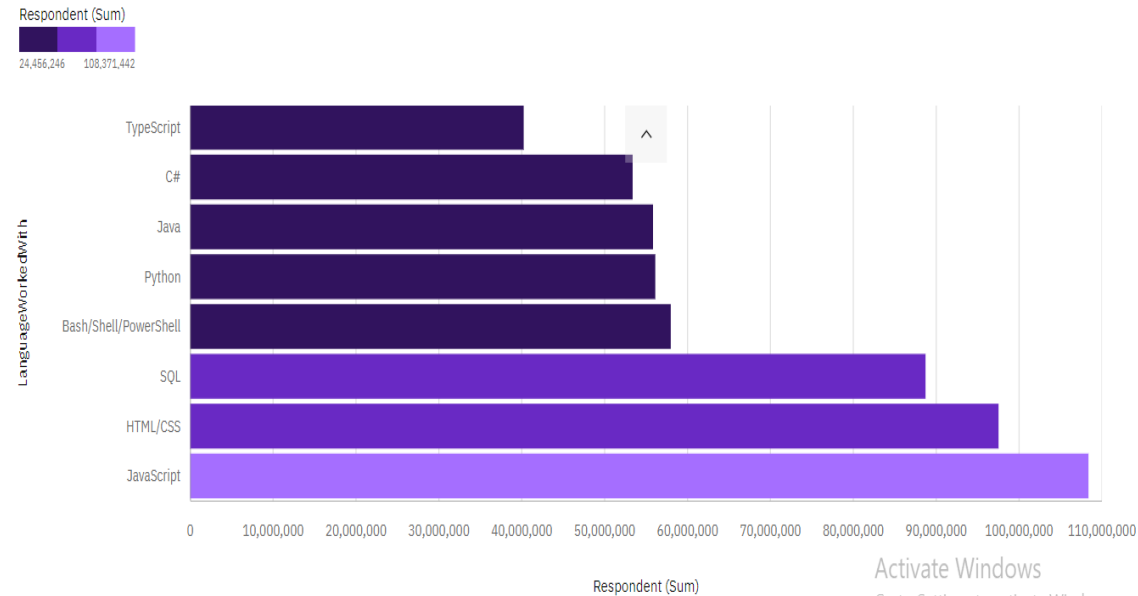

RESULTS

Respondent	LanguageWorkedWith	LanguageD...eNextYear	DatabaseWorkedWith	DatabaseD...eNextYear	PlatformWorkedWith	Platform
4	C	C	MySQL	MySQL	Linux	Linux
4	C++	C#	SQLite	SQLite	Windows	Window
4	C#	JavaScript	Null	Null	Null	Null
4	Python	SQL	Null	Null	Null	Null
4	SQL	Null	Null	Null	Null	Null
9	Bash/Shell/PowerShell	Bash/Shell/PowerShell	DynamoDB	PostgreSQL	AWS	AWS
9	C#	C	PostgreSQL	Redis	Docker	Docker
9	HTML/CSS	HTML/CSS	SQLite	SQLite	Heroku	Heroku
9	JavaScript	JavaScript	Null	Null	Linux	Linux
9	Python	Ruby	Null	Null	MacOS	MacOS

PROGRAMMING LANGUAGE TRENDS

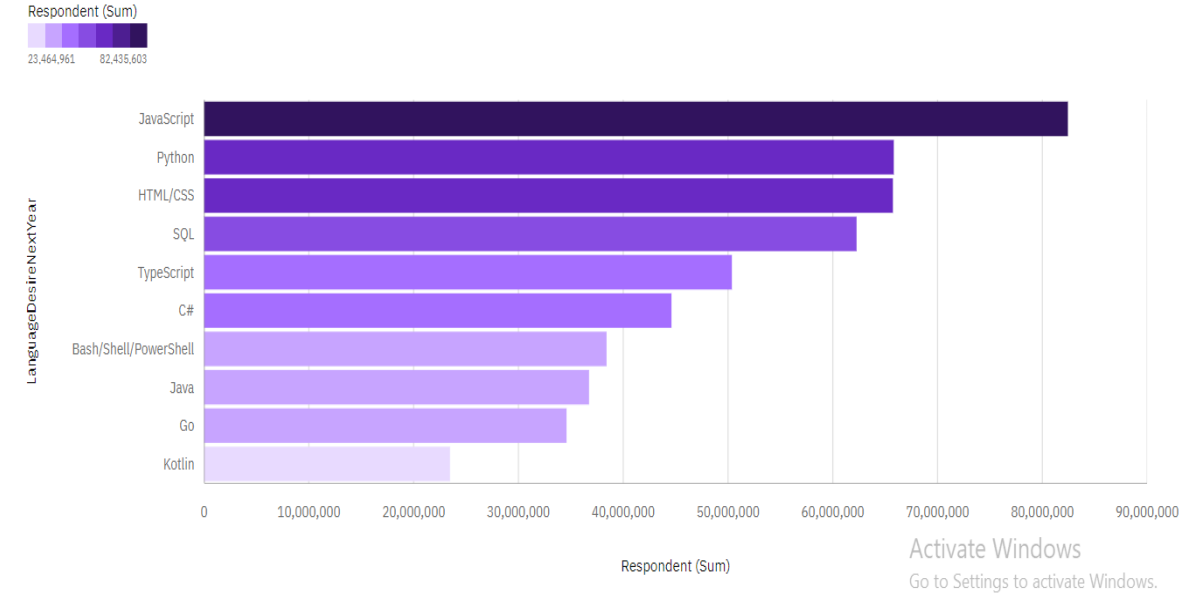

Current Year

Respondent Count for Top 10 Languages Worked With

Next Year

Respondent Count for Language Desire Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- Javascript, HTML,SQL are top 3 in this current year
- Python and TypeScript will be popular in the upcoming year
- Java will become the least favorite language in the future.

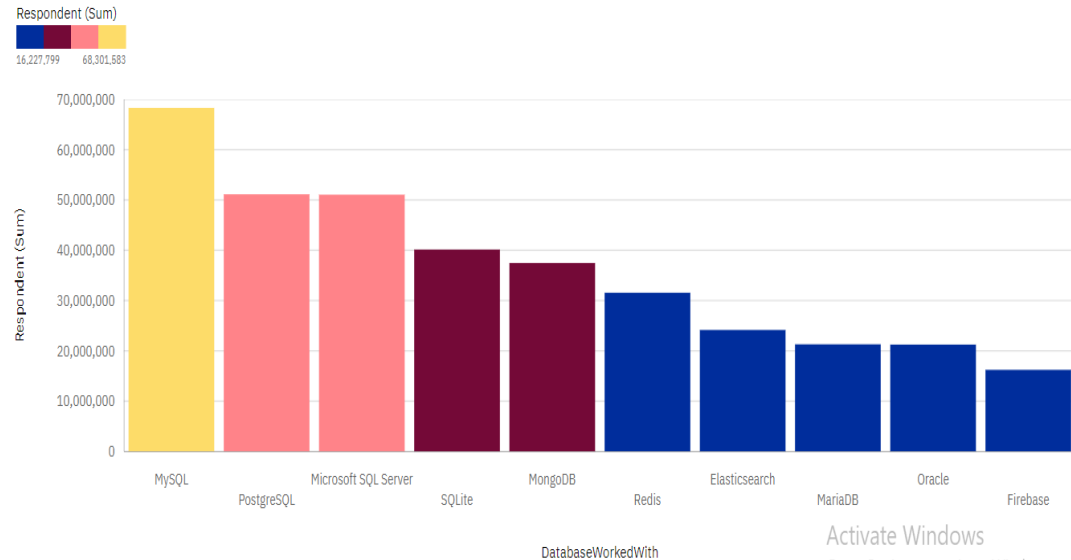

Implications

- Web development is in high demand in organizations.
- Big data technology still requires SQL in organizations.
- Companies still using Java might be late to accomplish their task as it is regarded to be slower than C++

DATABASE TRENDS

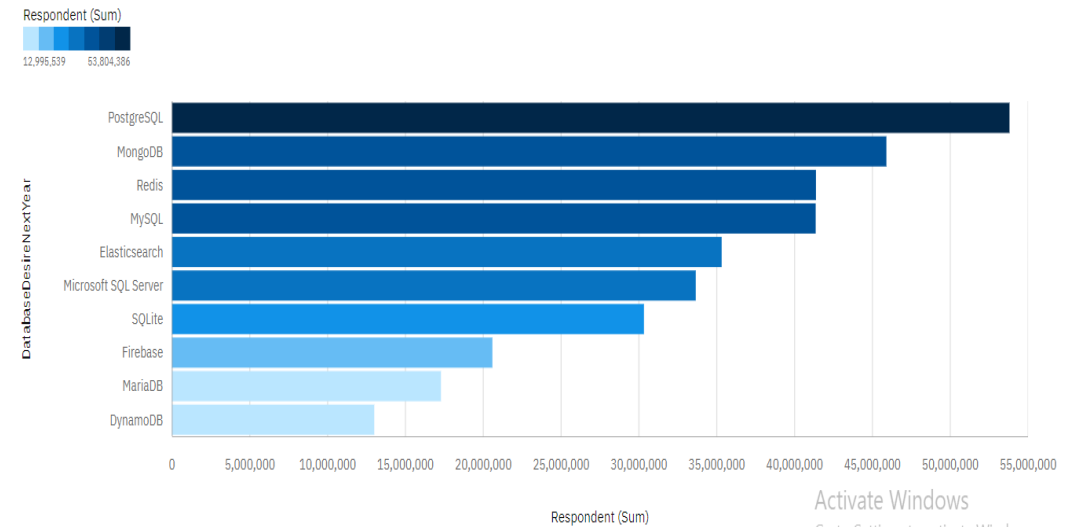

Current Year

Respondent Count for Top 10 Database Worked With

Next Year

Respondent Count for Database Desire Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- MySQL is currently the most popular database
- PostgreSQL is the second best databases
- Microsoft SQL seem to be an upcoming favorite too.

Implications

- As of the current year, this implies that open source databases are still preferable in organizations.
- Excellent performance with complex queries, large datasets.
- SQL servers will make an impact for relational database management system

Technology and Demographic Dashboard

Demographics

Respondent for Gender

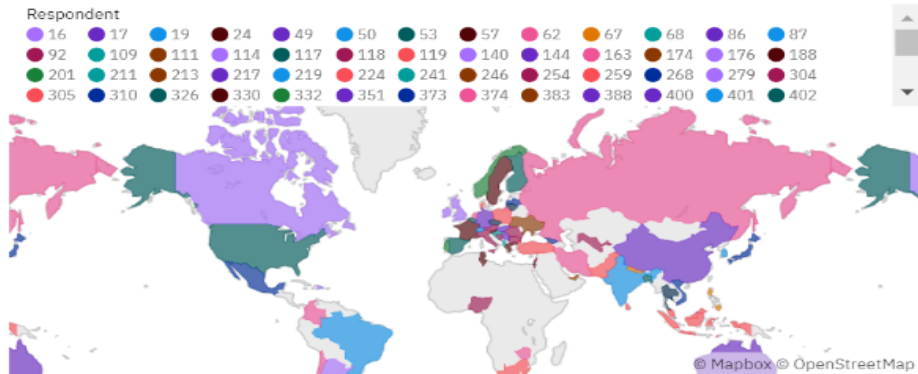

Gender
● Woman ● Man

Respondent Count by Age

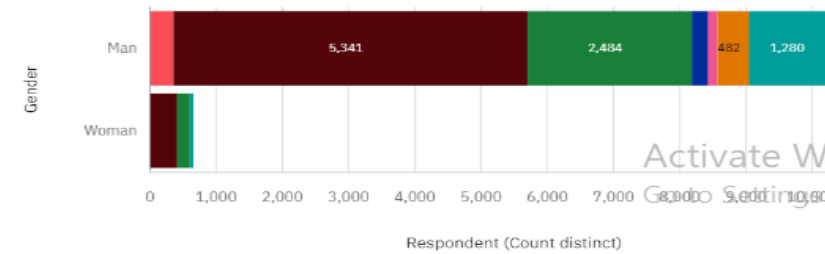

Respondent count for Countries

Respondent count of Gender classified by Formal Education Level

EdLevel
● Associate degree ● Bachelor's degree (BA, BS, B.Eng.... ● Master's degree (MA, MS, M.Eng.,...
● Other doctoral degree (Ph.D, Ed.D... ● Professional degree (JD, MD, etc.) ● Secondary school (e.g. American ...
● Some college/university study wit...

DISCUSSION

- Train and encourage workers to learn two or more programming languages.
- Technology trends now and in the future
- Improve female participation in the technology industry
- Encourage the use of technology in developing countries

OVERALL FINDINGS & IMPLICATIONS

Findings

- There is a rapid change in technology every year
- High preference on some programming languages and databases
- There is an existing gender gap in technology
- AWS and dockers are growing platforms

Implications

- Companies need to be flexible so as to adapt to the rapid changes in technology
- Leads to a higher employee efficiency rate.
- Less women in the technology field. Encourage them to learn computer skills and create opportunities for them.
- A shift to faster app deployment and cloud environments in future

CONCLUSION

Importance of staying updated: highlight the need for continuous learning and improvement of skills

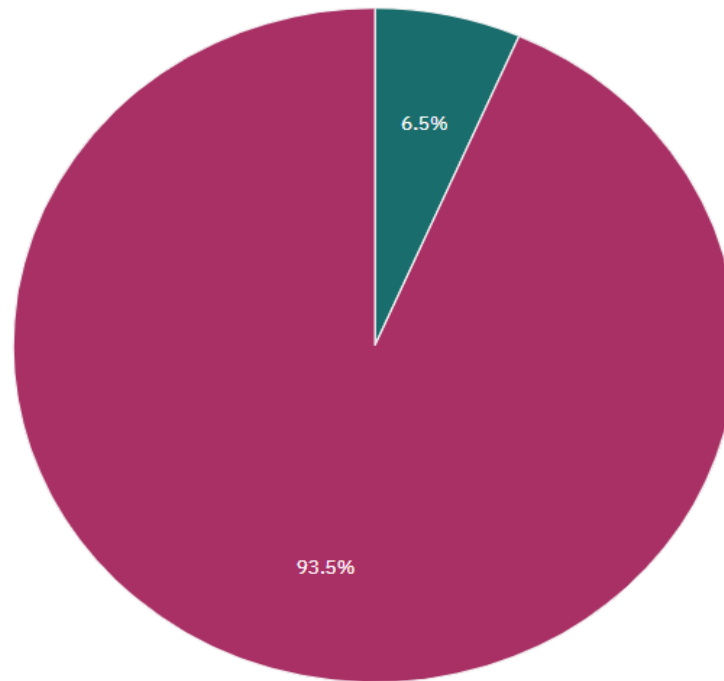

- **Current technology trends:** create awareness on programming languages, databases, and platforms.
- **Actionable insights by encouraging talent acquisition,**
- **The evolving Tech landscape:** brief overview of rapid technological advancements
- **Future trends and machine learning:** Anticipate future technologies and its potential impact on workforce
